

I fully support the comment submitted by the ARRL concerning Docket ET 03-104. The comments made by the proponents of Broadband over Power Lines (BPL) have little scientific data to support this docket. More research is needed to avoid the risk of irreparable interference to services licensed in the 2MHz-80MHz frequency range. Licensed amateurs provide a great and necessary service to the public. Approval of ET 03-104 would violate the existing FCC rules on non-interference and would be contrary to the best interest of the public.
